## Numbers up to 1000

### Place value of 3-digit number

We have learnt numbers up to 100 in grade-I,

**10 ones = 1 Ten**

Similarly, we can count by tens.

100

=

100

**10 Tens = 100**

Similarly, there are **100 ones**, therefore we can write **100 Ones = 100**

Where “100” is a three digit number, in which.

## Concept of 1000 as first four digit number

$$100 \text{ Ones} = 10 \text{ tens} = \text{One hundred}$$

We know the numbers from 100 to 999, where 999 means 9 hundreds, 9 tens and 9 ones.

$$9 \text{ hundred} + 9 \text{ tens} + 9 \text{ one} = \mathbf{999}$$

If we add one in 999 we get one thousand, and written as 1000

9 hundreds + 9 tens + 9 ones + one = 10 hundreds

10 hundreds = one thousand = 1000

1000 is the first four digit number, we can say

1000 = 1 thousand + 0 hundred + 0 tens + 0 ones

## FRACTIONS

In our daily life we divide things into two or more equal parts. Out of these one or all parts are called fractions, of the whole.

Take an apple. Cut it into two equal parts. Each part is a fraction of the apple.

Take a paper sheet. Cut it into three equal pieces. Each piece will be  $\frac{1}{3}$  of the total paper sheet.

Take a round bread. Cut it into four equal pieces. Each piece is  $\frac{1}{4}$  of the bread. Every part is called fraction.

## Concept of half

Take a circle and cut it into two equal parts.

Each part is one half of the circle.

We write one half as  $\frac{1}{2}$

## Colour one half of the following figures

## Write the numerical form of half in each

## Colour $\frac{1}{2}$ part of each figure

## Concept of one third

Take a rectangle as shown in figure,

and cut into three equal parts.

Each part is one third of the rectangle.

We write one third as  $\frac{1}{3}$ .

## Colour one third of each of following figures

## Write the numerical form of one third

## Colour $\frac{1}{3}$ part of each figure

## Concept of quarter

Take a circle and cut it into four equal parts.

Each part is one fourth or quarter of the circle.

We write one fourth as  $\frac{1}{4}$ .

## Colour one quarter of each of following figures

## Write the numerical from one quarter in each part

## Colour in $\frac{1}{4}$ part of each figure

## Concept of two third

Take a circle. Cut into three equal parts.

Two parts are two third of the circle.

We write two third as  $\frac{2}{3}$ .

The numerical form of two third is  $\frac{2}{3}$ .

## Colour two-third of each of following figures

## Write the numerical form of two-third

## Colour $\frac{2}{3}$ part of figure

## Concept of three fourth

Take a circle. Cut it into four equal parts.

Three parts are three fourth of the circle.

We write the three fourth as  $\frac{3}{4}$ .

## Colour three fourth of each of following figures

## Write the numerical form of three fourth shaded in each figures

$\frac{3}{4}$

# NUMBER OPERATION

After Learning this unit, the students will be able to:

- Add ones and ones.
- Add ones and 2-digit numbers with carrying.
- Add 2-digit numbers and 2-digit numbers with carrying.
- Solve real life problems, involving addition of 2-digit numbers, with carrying.
- Add 3-digit numbers and ones without carrying.
- Add 3-digit numbers and 2-digit numbers without carrying.
- Add 3-digit numbers and 3-digit numbers without carrying.
- Solve real life problems, involving addition of 3-digit numbers, without carrying.
- Add 3-digit numbers and ones with carrying of tens and hundreds.
- Add 3-digit numbers and 2-digit numbers with carrying of tens and hundreds.
- Add 3-digit numbers and 3-digit numbers with carrying of tens and hundreds.
- Solve real life problems with carrying of tens and hundreds.
- Verify commutative property with respect to addition
- Subtract ones from 2-digit numbers with borrowing.
- Subtract 2-digit numbers from 2-digit numbers with borrowing.
- Solve real life problems of subtraction with borrowing.
- Subtract ones from 3-digit numbers without borrowing.
- Subtract 2-digit numbers from 3-digit numbers without borrowing.
- Subtract 3-digit numbers from 3-digit numbers without borrowing.
- Solve real life problems of subtraction without borrowing.
- Subtract ones from 3-digit numbers with borrowing.
- Subtract 2-digit numbers from 3-digit numbers with borrowing.
- Subtract 3-digit numbers from 3-digit numbers with borrowing.
- Solve real life problems of subtraction with borrowing.
- Solve simple problems regarding addition and subtraction with carrying/borrowing in mixed form.
- Recognize and use multiplication symbol 'x'.
- Recognize multiplication as repeated addition (e.g.  $2 + 2 + 2 = 6 \longleftrightarrow 3 \text{ times } 2 = 3 \times 2 = 6$ ).
- Complete number sequences in steps of 2, 3, 4, 5 and 10 (e.g. in steps of 2 the sequence is expressed as 2, 4, 6, ....).
- Develop multiplication tables of 2, 3, 4, 5 and 10 till the multiplication  $10 \times 10$ .
- Multiply numbers within multiplication table.
- Verify commutative property of multiplication.
- Solve real life problems on multiplication.
- Recognize and use division symbol.
- Recognize division as successive subtraction.
- Divide numbers within the multiplication tables with remainder zero.
- Solve real life problems involving division.
- Solve real life problems (using Pakistani currency as well) involving addition, subtraction, multiplication and division.

## ADDITION

### Addition of Ones and Ones

Example:

$$\begin{array}{r} 4 \\ 4 \end{array} + \begin{array}{r} 2 \\ 2 \end{array} = \begin{array}{r} 6 \\ 6 \end{array}$$

$$\begin{array}{r} 4 \\ + 2 \\ \hline 6 \end{array}$$

## EXERCISE

Solve

|  |   |   |

## Addition of ones and two-digit numbers with carrying

**Example:- Add 17 and 6**

We first add ones which gives 13 ones. But 13 ones = 1 ten and 3 ones. So, we write 3 in ones column and carry 1 ten to tens column.

Now we add 1 ten + 1 ten = 2 tens  
Therefore  $17 + 6 = 23$

| Tens | Ones |
|------|------|
| 17   |      |
| +    | 6    |
| 23   |      |

## Addition of two-digit numbers without carrying

**Example:-**  $12 + 26$

$12 = 1 \text{ ten and } 2 \text{ ones}$

$26 = 2 \text{ tens and } 6 \text{ ones}$

Simply add ones  $2 + 6 = 8$ , write 8 in the ones column.

Now add tens  $1 + 2 = 3$ , write 3 in the tens column.

| Tens  | Ones |
|-------|------|
| 1     | 2    |
| $+ 2$ | 6    |
| 3     | 8    |

## Adding two-digit numbers and two-digit numbers with carrying

**Example:- Add 26 and 35**

| Tens | Ones |
|------|------|
| 2    | 6    |
| 3    | 5    |
| 6    | 11   |

Add 6 ones and 5 ones, we get 11 ones  
Where, 11 ones = 1 ten and 1 one  
Keep 1, in 1 ones column and carry 1 ten to the tens column.  
Now we add tens  
2 tens + 3 tens + 1 carry ten = 6 tens  
So, our answer is 61

## Addition of 3 digit number and 2 digit numbers without carrying

**Example:- Add 163 and 35**

| Hundreds | Tens | Ones |
|----------|------|------|
| 1        | 6    | 3    |
| +        | 3    | 5    |
| 1        | 9    | 8    |

Add 3 ones and 5 ones we get 8 ones, write 8 in ones column. Now add 6 tens and 3 tens and get 9 tens. Write 9 in tens column. 1 hundred writes same as. Therefore, the sum is 198.

| + 3      | 4    | 3    |
| 7        | 6    | 8    |

add 5 ones and 3 ones, we get 8 ones. Write 8 in ones column. Now add 2 tens and 4 tens and we get 6 tens. Write 6 in tens column. 4 hundreds and 3 hundreds are added and get 7 hundreds.

Therefore, the sum is 768.

## Real life problems

### Example

There are 175 mango and 323 orange trees in an orchard.  
How many trees are there in the orchard.

**Solution:**

$$\begin{array}{rcl}
 \text{Mango trees} & = & 175 \\
 \text{Orange trees} & = & 323 \\
 \hline
 \text{Total trees} & = & 498
 \end{array}$$

## Addition of 3 digit numbers and 1 digit numbers up to tens and hundreds (with carrying)

Example:- Add 657 and 8

| Hundreds | Tens | Ones |
|----------|------|------|
| 6        | 5    | 7    |
| +        |      | 8    |
| 6        | 6    | 5    |

Add 7 ones and 8 ones and get 15.  
Write 5 in ones column. Now add 1  
ten and 5 tens and get 6 tens, write 6  
in tens column. Write 6 hundreds in  
hundred column.  
Therefore, the sum is 665.

## Addition of 3 digit and 2 digit numbers with carrying up to hundred and tens

Add 8 ones and 6 ones and we get 14. Write 4 in ones column and 1 ten to tens column. Now add 4 tens. Add 1 carry, we get 5 tens and get 12 tens. Now write 2 in tens column. Now 1 carry add in 2 hundreds and get total 3 hundreds. Therefore, the sum is 324.

Example:- Add 248 and 76

| Hundreds | Tens | Ones |
|----------|------|------|
| ①2       | ①4   | 8    |
| +        | 7    | 6    |

## Add 3-digit numbers into 3-digit numbers with carrying of tens and hundreds

Add 7 ones in 5 ones and get 12. Write 2 in ones column and 1 write in tens column as carry. Now 1 carry add in 6 tens and 8 tens and total we get 15 tens. Write 5 in tens column and 1 ten add in 2 hundreds. Then add 1 hundred in it and total sum will be 4 hundreds.

Therefore, the sum is 452.

Example:- Add 267 and 185

| Hundreds | Tens | Ones |
|----------|------|------|
| ①2       | ①6   | 7    |
| + 1      | 8    | 5    |

## Commutative property with respect to addition

If we interchange the places of numbers in addition the answer will be the same. This property of addition is called commutative property.

**Example: 1**

$$3 + 4 = 7$$

$$4 + 3 = 7$$

$$4 + 3 = 7 = 3 + 4$$

**Example: 2**

$$4 + 5 = 9$$

$$5 + 4 = 9$$

$$= 9$$

$$= 9$$

## EXERCISE

Fill in the blanks by using commutative property of addition

1  $3 + 5 = 8 = \square + 3$

2  $6 + \square = 8 = \square + 6$

3  $2 + 3 = 5 = \square + \square$

4  $5 + \square = 9 = 4 + \square$

5  $\square + 6 = 7 = \square + \square$

6  $3 + \square = \square = 4 + 3$

7  $15 + 25 = 40 = \square + \square$

8  $10 + 20 = \square = \square + \square$

9  $42 + 32 = 74 = \square + \square$

10  $35 + \square = \square = 15 + 35$

## Subtraction of ones, from 3 digit numbers without borrowing

Example:- Subtract 4 from 3 2 6

| Hundreds | Tens | Ones |
|----------|------|------|
| 3        | 2    | 6    |
| —        |      | 4    |
| 3        | 2    | 2    |

Subtract 4 ones from 6 ones and 2 ones is remain. Write 2 in ones column. There are no subtraction process in 2 tens and 3 hundreds. So, we write same as.

Therefore, the answer is 322.

| —        | 3    | 4    |
| 6        | 2    | 3    |

Subtract 4 ones from 7 ones and place 3 in ones column. Then 3 tens subtract from 5 tens and 2 in remains. Write 2 in tens column. There is no subtraction process in 6 hundreds. So, the answer is 623.

## Subtraction of ones from 2 digit numbers (with borrowing)

To subtract 3 ones from 4 ones, borrow 1 one from 2 tens, so the total sum will 13. Now subtract 4 ones from 13 and get 9 ones. Write 9 in ones column. By borrowing 1 tens from 2 tens remains only 1 ten, so the answer is 19.

Example:-

Subtract 4 from 23

## Subtraction of ones, 2 digit numbers and 3 digit numbers from 3 digit numbers without borrowing

To subtract 7 ones from 2 ones, we borrow 1 one from 3 tens, so the sum will be 12. Now subtract 7 ones from 12 and we get 5 ones. Write 5 ones in ones column. By borrowing 1 ten from 3 tens, remain 2 tens. Write 4 hundred as same.

The answer is 425.

Example:-

Subtract 7 from 432

| Hundreds | Tens | Ones |
|----------|------|------|
| 4        | 3    | 2    |
| —        |      | 7    |
| 4        | 2    | 5    |

Example:- Subtract 4 from 643

| Hundreds | Tens | Ones |
|----------|------|------|
| 6        | 4    | 3    |

## Subtraction of ones, 2 digit numbers and 3 digit numbers from 3 digit numbers without borrowing

To subtract 8 ones from 6 ones, borrow 1 one from 3 tens, so the sum will 16. Subtract 8 ones from 16 and we get 8 ones. Write 8 in ones column. By borrowing 1 ten from 3 tens remain 2 tens. To minus 5 tens from 2 tens, we borrow 1 hundred from 4 hundreds and get 12 tens. Now subtract 5 tens from 12 tens and get 7 tens. To borrow one hundred from 4 hundred it remain 3 hundred.

So, the answer is 378.

Example:-

Subtract 58 from 436

| Hundreds | Tens | Ones |
|----------|------|------|
| 4        | 3    | 6    |
| —        | 5    | 8    |
| 3        | 7    | 8    |

Example:- Subtract 47 from 543

| Hundreds | Tens | Ones |
|----------|------|------|
| 5        | 4    | 3    |
| —        | 4    | 7    |

## Subtraction of ones, 2 digit numbers and 3 digit numbers from 3 digit numbers without borrowing

To subtract 9 ones from 6 ones borrow 1 one from 5 tens and get 16. Subtract 9 ones from 16 and we get 7 ones. Write 7 ones in ones column. By borrowing 1 ten from 5 tens, remain 4 tens. To subtract 6 tens from 4 tens we borrow 1 hundred from 4 hundreds and get 14 tens. Subtract 6 tens from 14 tens and get 8 tens. Write 8 in tens column. Subtract 2 hundreds from the remain 3 hundreds and get 1 hundred. 1 hundred write in hundreds column. The answer is 187.

Example:-

Subtract 269 from 456

## EXERCISE

- Salma has 354 beads in her garland.  
9 beads are red in colour and rest of them are blue in colour. How many blue beads are in the Salma's garland ?
- A hawker bought 325 water melons.  
He sold 49 out of them.  
How many water melons had left with him ?
- There are 450 students in a school hall.  
68 students were called back to the class by the teacher.  
How many student were left in the hall ?
- A chicken seller had 765 chickens.  
He sold 589 chickens.  
How many chickens were left ?

## Division

If there are 8 balls, How many balls can be distributed in 4 children ?

**Step: 1** Distributed an equal number of balls to each child.

**Step: 2** Once again distribute an equal number of balls to each child.

4 balls can be distributed two times from 8 balls it means that if we divide 8 balls to 4 children then each child will get 2 balls.

$$8 \div 4 = 2$$

"  $\div$  " is the symbol of division

$$\begin{array}{r} 2 \\ 4 \overline{) 8} \\ - 8 \\ \hline 0 \end{array}$$

Each child will get 2 balls.

Method of using the table:  $5 \div 15$

Put a circle on number 15 in the first row under 5.

Now put a circle in number 3 in front of 15 in the first column.

Hens the answer is :  $5 \div 15 = 3$

### Addition, Subtraction, Multiplication and Division

#### Example

650 tickets were sold on saturday and  
349 tickets were sold sunday.

How many tickets were sold in the two days ?

Tickets sold on saturday = 6 5 0

Tickets sold on sunday = +3 4 9

Tickets sold in two days = 9 9 9

# UNIT 3

## Measurement of Length, Mass and Capacity

After Learning this unit, the students will be able to:

- Recognize the standard units of length, i.e. metre, centimetre.
- Read and write standard units of length including abbreviations.
- Use appropriate units of length to measure  
(with straightedge/ruler) the objects.
- Solve real life problems involving measurements.
- Recognize the standard units of mass / weight, i.e. kilogram, gram.
- Read and write standard units of mass / weight including abbreviations.
- Solve real life problems involving mass / weight.
- Compare capacity of different objects (jug, glass, cup etc.).
- Recognize and use the standard unit of capacity/volume, i.e. litre.
- Read and write standard units of capacity/volume  
including abbreviations.
- Solve real life problems involving capacity/volume.

## Measurement of length

For the accurate measurement of length, the basic unit is the metre. It is denoted by “m”.

The smaller lengths are measured in centimetres. It is denoted by “cm”.

$$\begin{array}{lcl} \text{or} & 1 \text{ metre} & = 100 \text{ centimetres} \\ & 1 \text{ m} & = 100 \text{ cm} \end{array}$$

The metre rod is made of iron or wood which is used for measurement of cloth.

Length of black board is 3 metres.  
Breadth of the black board is 1 metre.

Length of the door is .....m  
Width of the door is .....m

Length of the window is .....m  
Width of the window is .....m

Length of the table is .....m  
Width of the table is .....m

Similarly, we measure the length of small objects in centimeters.

Length of nail is 4 cm.

Length of the eraser is 5 cm.

Length of pencil is 8 cm.

Length of the comb is 12 cm.

## EXERCISE

Use the ruler to measure the “ length ” of the following objects.

Length of the envelope = 5 cm

Length of the pen = .....

Length of the book = .....

Length of the scissor = .....

Length of the rectangle = .....

Length of the screw = .....

Length of the bat = .....

Length of the geometry box = .....

Length of the rope = .....

Length of the bag = .....

Length of the Rs. 20 note = .....

Length of the frame = .....

## Real life problems

### Example: 1

The length of green paper is 3 cm.  
If 2 green papers are joined together then the total length of both papers will be 6 cm.

$$3 \text{ cm} + 3 \text{ cm} = 6 \text{ cm}$$

### Example: 2

Similarly, if the length of an envelope is 4 cm,  
then the total length of 3 envelopes will be 12 cm.

$$4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} = 12 \text{ cm}$$

## EXERCISE

1. If one mat is 3m long. Another mat is 5m long.  
What will be the length of mats if joined together ?

$$3 \text{ m} + 5 \text{ m} =$$

2. Sara had 8 cm long sheet, she cuts 3 cm sheet. How much sheet is left ?

$$8 \text{ cm} - 3 \text{ cm} =$$

3. One table is 4 m long. Another table 2 m long. What will be the total length of the two tables if joined together ?

$$4 \text{ m} + 2 \text{ m} =$$

4. If the length of a piece of wood is 3 m what will be the total length of 3 wooden pieces ?

$$3 \text{ m} + 3 \text{ m} + 3 \text{ m} =$$

5. A book is 7 cm long.  
If 4 books of same length are placed together. Then what will be the total length of the books ?

$$7 \text{ cm} + 7 \text{ cm} + 7 \text{ cm} + 7 \text{ cm} =$$

Use your centimeter ruler. Measure the distance and write in table.

|        |       |
|--------|-------|
| A to B | 10 cm |
| A to C |       |
| B to D |       |
| B to C |       |

| D to G |  |
| E to F |  |
| F to G |  |
| C to G |  |
| G to E |  |

## Measurement of Mass/Weight

To find the mass of things we use the formal unit kilogram. We write 'kg' for kilogram. Things like sugar, flour, rice, grains etc are measured in kilograms. Similarly, to measure the mass of light things we use gram. We write 'gm' for gram.

1 Kilogram = 1000 gm  
or 1 kg = 1000 gm

Mass of chips packet  
is 10 gm

Mass of tomatoes  
is 7 kg

## EXERCISE

1. Tick ( ✓ ) the objects that weigh less than 1 kilogram

2. Cross ( ✕ ) the objects that weigh more than 1 kilogram

### 3. Write the weight

..... 3 Kg

..... Kg

..... Kg

..... Kg

..... Kg

..... Kg

## Real life problems

### Example

Rizwan bought 15 kg flour and 12 kg rice. What is total weight of things he bought ?

| Objects | kg      |
|---------|---------|
| Flour   | = 1 5   |
| Rice    | = + 1 2 |
| Total   | = 2 7   |

### EXERCISE

- 1 Add 75 kg and 25 kg

|         |
|---------|
| 75 kg   |
| + 25 kg |
| 100 kg  |

- 2 Subtract 150 kg from 375 kg

|          |
|----------|
| 375 kg   |
| – 150 kg |
|          |

- 3 Bilal bought 30 kg mangoes and 27 kg oranges. What is the total weight of fruits ?

|  |
|--|
|  |
|  |

- 4 Anwar bought 120 kg sugar and 240 kg rice. What will be the total weight ?

|  |
|--|
|  |
|  |

- 5 Mother bought 50 kg potatoes from one shop and 75 kg potatoes from another shop. Find the total weight of the potatoes.

|  |
|--|
|  |
|  |

- 6 If the mass of one bag flour is 100 kg and mass of another bag is 500 kg. What is the difference of mass between the two bags.

## Measurement of Capacity

The jug holds more water than glass

Jug

Glass

The kettle holds more tea than cup

Kettle

Cup

Capacity is the amount of liquid that a container can hold.

The unit used for measuring the capacity of liquid is litre and it is denoted by "*l*"

$$1 \text{ litre} = 1000 \text{ millilitre}$$

$$1 \text{ } l = 1000 \text{ } ml$$

Litre is the unit of the capacity to measure the liquid. We use litre for measurement of water, milk, petrol, diesel and kerosine oil etc. In daily life the following pots are used for measuring the liquid in litres.

This jug contains 1 litre water

This is litre pot used by milk seller to measure milk

This is a litre bottle used to measure the petrol

## EXERCISE

1. Tick ( ✓ ) which have more capacity.

2. Cross ( ✕ ) which have less capacity.

**Example: 1** Add 37 litres milk and 25 litres milk.

**Solution:**

|   |   |   |
|---|---|---|
| 3 | 7 | ℓ |
| + | 2 | 5 |
| 6 | 2 | ℓ |

**Example: 2** Subtract 45 litres oil from 86 litres oil.

**Solution:**

|   |   |   |
|---|---|---|
| 8 | 6 | ℓ |
| - | 4 | 5 |
| 4 | 1 | ℓ |

**Example: 3** Milk seller purchased 40 litres of milk from 1<sup>st</sup> shopkeeper and 25 litres of milk from 2<sup>nd</sup> shopkeeper.

How much milk he has purchased ?

**Solution:**

|   |   |   |
|---|---|---|
| 4 | 0 | ℓ |
| + | 2 | 5 |
| 6 | 5 | ℓ |

## EXERCISE

1. Add 55 litres and 38 litres.

|        |  |
|--------|--|
| 55 ℓ   |  |
| + 38 ℓ |  |
| ℓ      |  |

2. Subtract 35 litres from 78 litres.

|        |  |
|--------|--|
| 78 ℓ   |  |
| - 35 ℓ |  |
| ℓ      |  |

3. Find the difference of 150 litres and 130 litres.

|         |  |
|---------|--|
| 150 ℓ   |  |
| - 130 ℓ |  |
| ℓ       |  |

4. There is 65 litres of milk in a container.  
15 litres of milk is added in it.  
How much milk in the container ?

|        |  |
|--------|--|
| 65 ℓ   |  |
| + 15 ℓ |  |
| ℓ      |  |

5. A water tank has 130 litres of water. If 165 litres water is poured into the tank, then how much water will be in the water tank ?

|         |  |
|---------|--|
| 130 ℓ   |  |
| + 165 ℓ |  |
| ℓ       |  |

6. There is 38 litres of kerosine oil in a pot.  
If 24 litres of oil is sold, then how much kerosine oil is left in the pot ?

|        |  |
|--------|--|
| 38 ℓ   |  |
| - 24 ℓ |  |
| ℓ      |  |

# UNIT 4

# TIME

After Learning this unit, the students will be able to:

- Know the number of hours in a day and number of minutes in an hour.
- Read and write the time from a clock in hours and minutes (with five minute intervals) e.g., read 8:15 as eight fifteen and 8:50 as eight fifty.
- Recognize a.m. and p.m.
- Draw hands of a clock to show time in hours and minutes (with five minute interval)
- Use solar calendar to find a particular date.
- Use lunar calendar to find a particular date.

Clocks or watches tell us about the time. These are in many sizes and shapes.

## About the clock

A clock has a dial on which “1” to “12” numbers are written. Short hand moves from one number to other number in “**One Hour**”. Long hand moves from one number to other number, in five minutes. Long hand completes a round in one hour. Short hand completes a round in 12 hours.

|        |   |            |
|--------|---|------------|
| 1 Hour | = | 60 Minutes |
| 1 Day  | = | 24 Hours   |

## Telling the Time

Look at the clock. The hour hand is at “1” and the minute hand is at “12” then time is 1 o’clock. Remember, the minute hand takes one minute to move from one mark to another. There are five minutes between two numbers.

## EXERCISE

1. What is the time on each clock.

3 o'clock

6 o'clock

11 o'clock

7 o'clock

2. Draw the hands of hour and minute to show the time.

12 o'clock

4 o'clock

5 o'clock

8 o'clock

## Telling the time in hours and minutes.

The big hand takes five minutes to reach from one number to another.

It is five past five.

To count 5, 5 numbers is helpful for telling time in minutes.

## EXERCISE

Write the time in words.

## Telling the time is Hours and Minutes with 5 minutes interval

In this clock the hour hand is very near to “4” and the minute hand is on “2” the time is **4:10** and read as four ten.

Similarly in this clock the hour hand is very near to “5” and the minute hand is on “10” the time is **5:50** and read as five fifty.

### EXERCISE

1. What is the time on each of the following clocks?

**3:10**

## 1. Fill in the blanks

1 hour =  minutes

1 day =  hours

2 hour =  minutes +  minutes =  minutes

2 day =  hours +  hours =  hours

## 2. Match the clock with the time

## 2. Draw the minute hand to show the given times

3:20

1:45

9:55

3:40

10:25

7:30

11:40

3:45

## 3. Draw the hour hand to show the given times

12:45

11:20

6:10

2:35

1:30

7:35

1:55

3:05

## Recognition of “a.m.” and “p.m.”

Remember, we use a.m. to tell the time from just after 12 mid night to just before 12 noon.

The time is six o'clock  
in the morning.

6.00 a.m.

The time is quarter past  
seven in the morning.

7:15 a.m.

The time is quarter to  
eight in the morning.

7:45 a.m.

The time is eight  
o'clock in the morning.

8.00 a.m.

The time is half past  
eight in the morning.

8:30 a.m.

Similarly, we use "p.m." to tell the time from 12 noon to just before 12 midnight.

The time is one thirty in the afternoon.

1:30 p.m.

The time is five o'clock in the afternoon.

5:00 p.m.

The time is half past seven in the evening.

7:30 p.m.

The time is quarter to ten in the night.

9:45 p.m.

**Fill in the boxes with a.m. or p.m.**

It is six o' clock  
in the morning.

6:00 a.m.

It is eleven thirty  
in the morning.

It is five forty  
in evening.

It is nine forty five  
at night.

It is eleven o' clock  
at night.

# SOLAR CALENDAR

Solar calendar depends upon the solar system. In solar system the earth revolves around the sun. The time taken by one revolution of earth is called **“One Solar Year”**. A solar year has been divided into 12 months.

|           |            |             |           |            |            |

## EXERCISE

### Fill in the blanks

|  |                         |
|--|-------------------------|
| 1. First date of new year                  | 1 <sup>st</sup> January |
| 2. Last date of the year                   |                         |
| 3. Independence day of Pakistan            |                         |
| 4. Birth day of Quaid-e-Azam               |                         |
| 5. Last day of 2nd month of solar calendar |                         |
| 6. Defence day of Pakistan                 |                         |
| 7. Birthday of our national poet           |                         |
| 8. Your date of birth ?                    |                         |

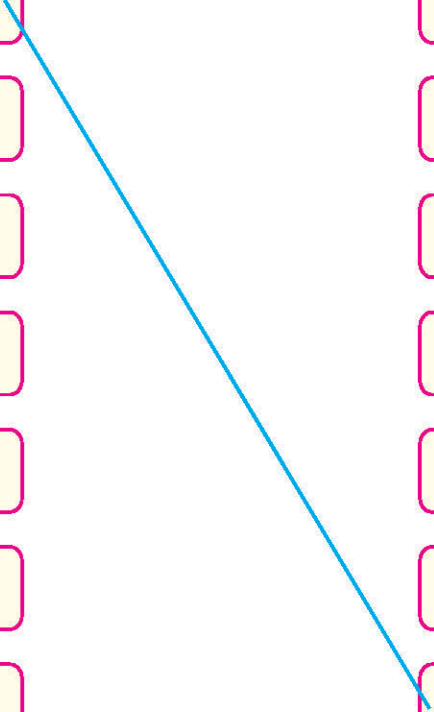

### Fill in the blanks

|  |         |
|--|---------|
| 1. The month of fasting  | Ramazan |
| 2. The first month of islamic calendar                         |         |
| 3. The last month of islamic calendar                          |         |
| 4. The name of birth month of our last prophet Mohammad (PBUH) |         |
| 5. The sixth month of islamic calendar                         |         |
| 6. The month of Hajj   |         |

## EXERCISE

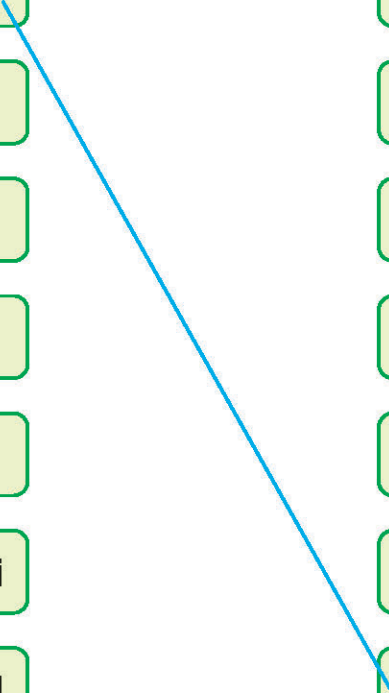

### 1. Match the solar months with respect to their positions

|           |                        |
|-----------|------------------------|
| March     | 1 <sup>st</sup> month  |
| December  | 11 <sup>th</sup> month |
| January   | 8 <sup>th</sup> month  |
| October   | 5 <sup>th</sup> month  |
| July      | 9 <sup>th</sup> month  |
| September | 2 <sup>nd</sup> month  |
| February  | 3 <sup>rd</sup> month  |
| May       | 6 <sup>th</sup> month  |
| August    | 10 <sup>th</sup> month |
| April     | 7 <sup>th</sup> month  |
| June      | 12 <sup>th</sup> month |
| November  | 4 <sup>th</sup> month  |

## 2. Match the lunar or Islamic calendar with respect to their order

|                 |                |
|-----------------|----------------|
| Rajab           | Eighth month   |
| Muharrum        | Second month   |
| Zeeqaud         | Twelfth month  |
| Safar           | Eleventh Month |
| Rabi-ul-Awwal   | Tenth month    |
| Jamadi-us-Saani | Fifth month    |
| Jamadi-ul-Awwal | Seventh month  |
| Zilhaj          | Fourth month   |
| Shaaban         | Third month    |
| Ramzan          | Sixth month    |
| Rabi-us-Saani   | Ninth month    |
| Shawwal         | First month    |

# UNIT 5

## GEOMETRY

After Learning this unit, the students will be able to:

- Identify the figures like square , rectangle, triangle, circle, semi-circle and quarter-circle.
- Identify vertices and sides of a triangle, rectangle and square.
- Differentiate between a straight line and curved line.
- Identify straight and curved lines from the given line drawings
- Use straightedge/ruler to draw a straight line of given length (exclude fractional lengths).

## Geometrical Figures

This is a square

This is a rectangle

This is a triangle

This is a circle

This is a semi circle

This is a quarter circle

**Colour the square**

**Colour the rectangle**

**Colour the triangle**

**Colour the circle**

## Activity

This is a card of a circle shape.

If we fold it, it will be a semi circle.

If we fold it again, it will be quarter circles.

Quarter Circle

## EXERCISE

### 1. Count and write the number of shapes

Circles

9

Rectangles

Triangles

Square

### 2. Count and write the number of shapes

Semi Circle

Quarter Circle

Circles

Triangles

### 3. Match the shapes with objects

## Vertices and sides of a triangle, rectangle and square

- ▶ It is a triangle.
- ▶ It has three vertices.
- ▶ It has three sides.

- ▶ It is a square.
- ▶ It has four vertices.
- ▶ It has four sides.

- ▶ It is a rectangle.
- ▶ It has four vertices.
- ▶ It has four sides.

- ▶ It is a circle.
- ▶ It has no vertices.
- ▶ It has no sides.

## Straight lines and curved lines

This is a piece of string.

When we stretch it.

It makes a straight line.

Similarly, when we loose the string it makes a curved line.

Now we can draw a shortest possible path from point **A** to **B** this path is called straight line, whereas the curved path from **A** to **B** is called curved line.

**Identify and write the numbers of straight line and curved line in the following figure.**

Straight lines

Curved lines

## Drawing of straight lines

In the given below figure from point A to B is a shortest path between two points.

It is a 3 cm straight line

**A**      **3 cm**      **B**

Again, from point C to D is a shortest path between another two points.

It is a 7 cm straight line

**C** **7 cm** **D**

Similarly, what is the length of straight line from the points E to F ?

**E** **F**

|                                |     |
|--------------------------------|-----|
| The length of straight line is | cm. |
|--------------------------------|-----|

## Drawing of straight lines using ruler

### Example: 1

Draw a straight line of 5 cm, long.

1. Take a sheet of white paper

2. Place a ruler on the sheet

3. Mark the first point as **A** with pencil

4. Mark the second point as **B** and draw a line of 5 cm, long

5. The line **A** to **B** is a 5 cm, straight line

### Example: 2 Measure the given straight line from **M** to **N**

1. Place the **0** of ruler at point **M** of the straight line from **M** to **N**

2. Count the length of straight line from point **M** to **N**

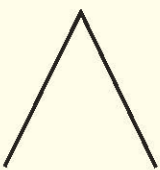

3. The measurement of straight line from **M** to **N** is 7cm.

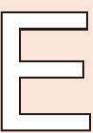

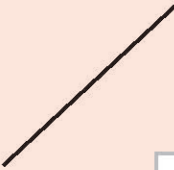

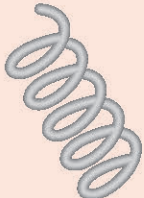

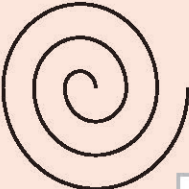

## EXERCISE

1. Tick (✓) the straight lines in the following shapes

| <br><input type="checkbox"/>            | <br><input type="checkbox"/> | <br><input type="checkbox"/> |

3. Measures the following lines with straight edge / ruler

4. Draw the straight lines of the following measures

|      |   |
|------|---|
| 5 cm | <div style="text-align: center;"> <div style="display: inline-block; width: 150px; height: 1.2em; background-color: yellow; border: 1px solid black; position: relative;"> <span style="position: absolute; top: -1.2em; left: 50%; transform: translateX(-50%);">5 cm</span> </div> </div> |
| 7 cm |   |
